

NMP TeAm

At the service of the NMP NCP Network & its clients

NMP NCP Network is the main provider of guidance, practical information and individual assistance of participation in the thematic priority “Nanosciences, nanotechnologies, materials & new production technologies (NMP)” of the Seventh Framework Programme (FP7). The Network includes the National Contact Points (NCPs) from all 27 EU member states and associated states as well as NMP third country contacts.

The **NMP TeAm** project aims for an improved NMP NCP service across Europe to the benefit of its clients. This will be achieved through closer collaboration between the NMP NCPs in Europe and beyond and normalisation of the differences in knowledge and improvement in the quality of provided services across the NCP Network. To this effect the project **objectives** are to:

- Create an interactive partner search system and website open to all its clients
- Maximise networking opportunities for its clients through brokerage events, joint stands and joint awareness campaigns
- Standardise the Network skills and provided services through documentation as well as through training actions
- Forge stronger links with all NMP related platforms, networks and EU initiatives in Europe.
